Facility Renovation Project | 2016

## BE IN THE KNOW

### What's the goal of this project?

Our goal is to enhance the member experience for the families we currently serve. We believe all members will benefit from this facility upgrade.

### What are the main changes?

- Childwatch will be moved downstairs and gain a children's restroom
- Most staff offices will be moved to a modular unit in the current playground area
- With changes to staff office space and Childwatch, we will be able to add a third (and the largest) studio, and expand the existing Cycling studio

### What does this mean for my membership?

- The new facility design will better your experience as a Y member, and the look and feel of the building
- More convenient, and expanded, group exercise classes
- The new Childwatch Center will be located in the lobby area, making it easier for families to check-in, with a separate children's restroom.

### What is happening to the playground?

The current playground will be retired. We will be able to develop a new outdoor play space in the yard along the side of the building. We will be seeking member input on the design of this new space, and look forward to a new space for children and families to enjoy.

### When is this happening?

We continue to work on the phasing and financing of this project. We hope to kick off construction before Spring 2016. Projects of this scope typically take six months.

### Will the Y shut down during construction?

Our goal is to minimize the effect of construction on your member experience. We are not planning to shut down entirely at any point, and we will keep all stakeholders posted on the progress of the project, and timing of each phase.

### How is this project being funded?

This project will be funded through organizational resources, and a capital campaign. We're increasing the value of your membership through philanthropic support!

**With a modern, convenient facility,  
we'll be better able to serve families,  
youth, and you.**
