Providing homework help and enrichment activities to children in China Basin

YMCA Youth Development in the South-of-Market Area

A program of the Embarcadero YMCA

Giving to the Y helps the next generation of Americans succeed with after-school enrichment. For children whose parents do not speak English as a native language, homework help plays a crucial role in improving grades and test scores. Working parents surveyed at this site identified safe, low-cost childcare as the community's top priority. Through a partnership between the YMCA and the Mission Housing Development Corporation, bilingual YMCA caregivers provide homework help and fun enrichment activities to children who live in this low-income housing development in China Basin.

Our Mission:

The Embarcadero YMCA builds strong kids, strong families and strong communities by enriching the lives of all people in spirit, mind, and body.
